

Dear Dr. Henney,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-1211\CP1

☒ All GE foods should be labeled so I am informed and have a choice.

☒ GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing to determine the long-term impacts to human health and the environment.

(Additional Personal Comments:)

*The cancer rate seems to be steadily on the increase (is it now 1 in 3?), and a definitive cure has eluded scientists. I want to avoid anything (including GE foods) that has the slightest chance of causing cancer or other illness.*
